

RIMECK®

WORKWEAR MADE REAL

The RIMECK® brand effectively melds the rigorous demands of workwear with the latest fashion trends. Our products not only look great but also withstand the rigours of everyday wear. Each piece must satisfy four essential criteria - striking design, meticulous craftsmanship, top-quality materials, and a primary focus on your safety. Rest assured, we are committed to this principle.

VERTEX

LUXURY COLLECTION BY RIMECK®

The VERTEX collection combines technologically advanced fibers, comfort and an outdoor look. Workwear can thus be highly durable, flexible and stylish at the same time!

CERTIFICATION - W07

EN ISO 13688:2013/A:2021 – Protective Plaining - this international standard specifies the general requirements for the implementation of protective workwear in terms of ergonomics, safety, size designation, wearout, marking of protective Plaining and the information which is supplied by the protective Plaining manufacturer.

EN 14404:2004+A1:2010 – Personal protective equipment - Knee pads for kneeling work - The standard specifies requirements for knee protection for kneeling work where there is a risk of injury due to surface mechanical effects. The protectors must be harmless to health and safe for the users.

WATER RESISTANT TREATMENT (W55, W56)

The waterproof TPU membrane resists moisture penetration very well while maintaining the flexibility of the entire material. Water column 10 000 mm.

BREATHABLE MATERIAL (W55, W56)

The 3-layer material helps to regulate water vapour, reliably moving it away from the body and creating a feeling of comfort. Breathability of 4,000 g/m²/24 hours.

THERMAL REFLECTIVE ZONE (W55, W56)

Thermo reflective zone on the back.

ANTI-SOILING FINISH (W07)

The ability of the top material to repel liquid, dirt and greasy dirt.

CORDURA (W07)

The use of CORDURA® material makes the trousers even more resistant, especially against punctures or tearing.

JACKET 501, 504

Fleece men's · women's
S-4XL · XS-2XL

Fleece, 100 % polyester, antipilling finish, 280 g/m²

- insulating fabric · full-length molded zipper · pockets with molded zipper · bottom hem adjustable by elastic drawstring
- sleeve hems with elastic band · women's: slight fit cut

4XL size available in colours 01, 02, 05, 23, 94

JACKET HI-Q 506

Fleece unisex
S-3XL

Fleece, 100 % polyester, antipilling finish, Complementary material: Rip Stop, 100 % polyamide, inner PU coating, 360 g/m²

- highly insulating fabric · shoulders covered by a waterproof, abrasion-resistant fabric · full-length molded zipper
- pockets with molded zipper · bottom hem with elastic band · sleeve hems adjustable by velcro

For further information about the delivery date of new arrivals, please contact the Sales department.

EFFECT 530

Fleece unisex
S-3XL

Fleece, 100 % polyester, antipilling finish; complementary material: plain weave, 100 % polyamide, 360 g/m²

- highly insulating fabric · shoulders and elbows covered by a waterproof, abrasion-resistant fabric
- full-length molded zipper · pockets with molded zipper
- sleeves ended by cuffs · bottom hem adjustable by elastic drawstring

CASUAL 550

Softshell jacket men's
S-3XL

Knitted softshell: 100 % polyester; micro fleece - 100 % polyester
Softshell: 96 % polyester, 4 % elastane; micro fleece - 100 % polyester, Lining: 100 % polyester, 350 g/m²

- 2-layer softshell · combination of knitted and plain fabric · full-length reverse coil zipper
- sleeve hems adjustable by velcro · pockets with reverse coil zipper · 2 inner pockets · contrast elements

RIP STOP

Very strong, regularly repeating weave. In this smooth fabric, thick warp and weft threads are interwoven in intervals of 5-8 mm. The surface gets an effect of a grided structure. This apparent grid significantly increases the fabric's resistance to ripping and tearing.

NEXT 518

Fleece vest unisex

CERTIFICATION

of RIMECK work clothes

Selected garments from the collection HIGH VISIBILITY (HV) Rimeck correspond to the international standards, which determine the optimal form of protective Plaining with high visibility. Certified garments from the HV collection are supplied with a leaflet providing information on proper storage, treatment and purpose.

EN ISO 20471:2013 – High visibility Plaining – this international standard specifies requirements for Plaining with high visibility, which is able to visually indicate the presence of a user for vehicles or other mechanized means of transport under any light conditions, both in daylight and when illuminated by headlights of vehicles at night.

High visibility Plaining are made of fluorescent material, and in combination with reflective stripes are divided into three categories:

Category 3 – the highest level of protection – the minimum required substrate surface is 0.80 m² and 0.20 m² of retroreflective material.

Category 2 – the medium level of protection – the minimum required substrate surface is 0.50 m² and 0.13 m² of retroreflective material.

Category 1 – the minimum level of protection – the minimum required substrate surface 0.14 m² and 0.10 m² of retroreflective material.

EN 1150:1999 – Protective Plaining – caution Plaining with high visibility for non-professional use – standard specifies requirements for optical properties of caution high visibility Plaining suitable for adults or teenagers, not for professionals. The garments are designed for visual indication of the presence of users in all light conditions, both in daylight in urban lighting and when illuminated by headlights of vehicles at night.

EN 343:2003+A1:2007 – Protective clothes – Rain protection - European standard determining the properties of fabrics and seams of a protective garment. The characteristics of these are measured for the outside of the clothes. After achieving the specific permeability requirements and reaching the appropriate certification, it provides protection against water penetration and resistance against steam penetration for the wearer.

EN ISO EN ISO 13688:2013/A1:2021 – Protective Plaining - this international standard specifies the general requirements for the implementation of protective workwear in terms of ergonomics, safety, size designation, aging, marking of protective Plaining and the information which is supplied by the protective Plaining manufacturer.

EN 14404:2004+A1:2010 – Personal protective equipment - Knee pads for kneeling work - The standard specifies requirements for knee protection for kneeling work where there is a risk of injury due to surface mechanical effects. The protectors must be harmless to health and safe for the users.

TYPE 2 – foam plastic or other filling material in trouser pockets, or permanently attached to trousers.

LEVEL 0 – only suitable for use on a flat surface - does not protect against punctures

LEVEL 1 – suitable for use on flat or uneven surfaces - protection against puncture with a force of at least 100 ± 5 N

LEVEL 2 – suitable for use on flat or uneven surfaces in demanding conditions - protection against puncture with a force of at least 250 ± 10 N
