

Pica **VISOR** Board Marker

Never
Dries Out!

Pica VISOR

Longlife Board Marker

How happy are you with your board markers?

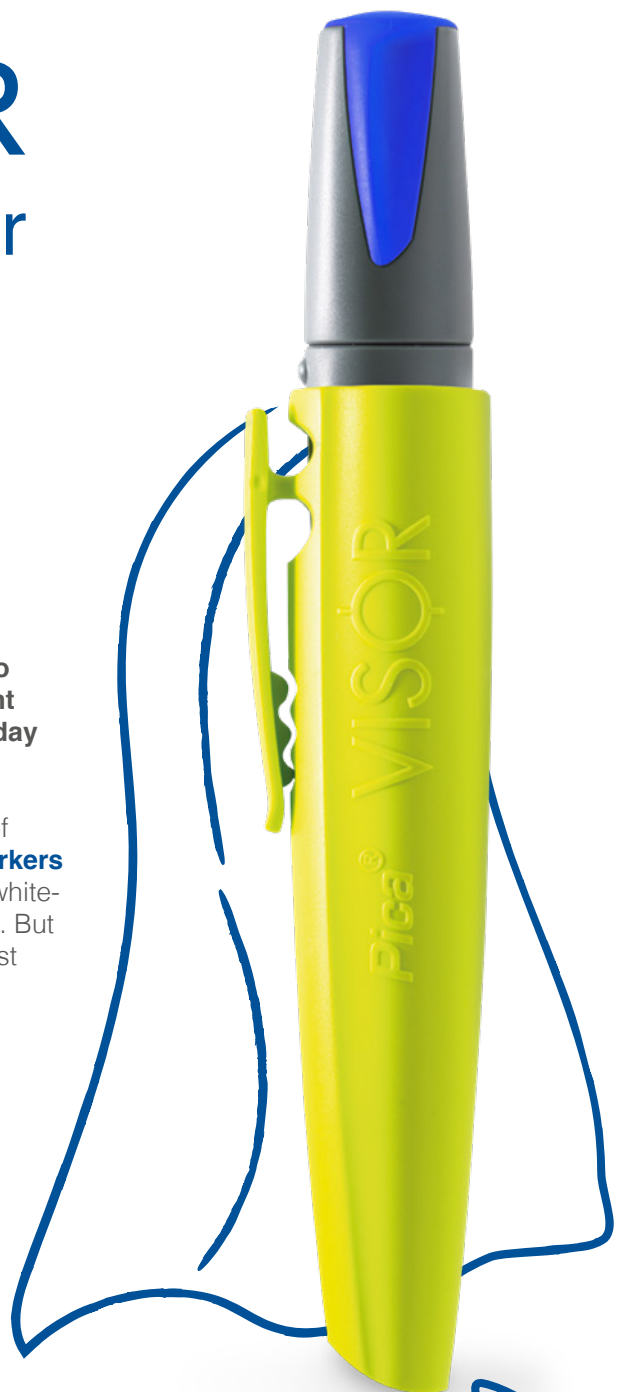

Hundreds of thousands of people use whiteboards daily to communicate, design and share knowledge. An unpleasant side-effect: whiteboard markers that do not work in everyday classroom life - the problem is certainly familiar to you.

You are likely to experience annoyance, frustration and a lot of unnecessary rubbish. A frequent cause for this: **dried out markers** that **become unusable** as a result. The problem is as old as whiteboard markers are, because their functional life is very limited. But now there is an **innovative and sustainable solution** - the first whiteboard marker with refillable gel refill that never dries out:

The PICA VISOR Board Marker

1 x
refill set replaces up
to 20 ink markers

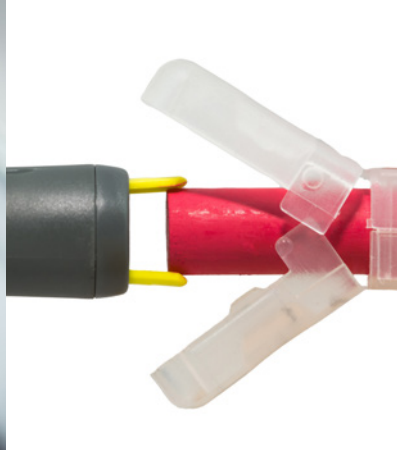

The only
sustainable
board marker
worldwide

The hero
in the battle against
the one-way madness
#INKBUSTER

Easy to Refill

In a **few seconds** and with **clean hands** you can fill a new refill into the pen. This is made possible by the modern and high-quality marker with its twist mechanism: **By screwing it out completely, you dock on the fresh refill without touching it.** Then simply twist it back again and you're done.

Available in 8 different colours

Never Dries Out

The new and **innovative gel refill** makes it possible. It can be used up to the last stub.

Clean Thing

Markings can be **wiped dry** from all smooth surfaces without producing dust, unlike ink markers, which cause fine dust when dry-wiped.

Durable & Green

The combination of refillable gel leads with extremely **economical consumption** and the modern, high-quality marker with twist mechanism are the **basis for long-term use**. This is good for the environment and also for your budget.

Ready for Immediate Use

The Pica Visor board marker **always delivers full performance**, from the first to the last stroke.

Removable Without Any Residues

Thanks to the innovative gel refill, inscriptions can be **wiped dry** from all smooth surfaces **without residue** using a professional wiper - the microfibre cloth used is **easy to wash, even under cold water**.

The built-in **power magnets** in both the pen holder and the professional wiper ensure a secure hold on the whiteboard.

The Product Range
